

HEAVY CUBE TEAK SIDE TABLE

Heavy Cube Teak Side Table can be used as a stool, footrest, side table or decorative object. It is handmade from a single piece of teak wood. It has a natural appearance that reflects the texture of the tree. Appropriate for heavy commercial use, these grade A teak tables are constructed of large teak timbers with sturdy mortise and tenon joinery. Natural teak roots add a touch of organic texture to spaces indoors or out. Each has unique character, with dramatic highs and lows in the finish. Over time, teak weathers and greys in the sun for a found feel. Safe for outdoor spaces — cover or store indoors during inclement weather and when not in use. Important note: As wood is a natural product, the colors, grain patterns and shapes vary from piece to piece, making each of their stools unique and different from the next.
